jQuery Mobile: Building a Mobile Website

Get Up and Running as a Mobile Site Developer

Price: $39.99

Available as: On-Demand Training

In this course, expert web developer and trainer Candyce Mairs gets you up and running as a mobile site developer using the jQuery Mobile framework. You'll learn the difference between jQuery Mobile and HTML pages and become familiar with the idea of using libraries and themes to feature and style your mobile website. Then you'll get started creating and updating pages in the mobile space, and even learn how to add features like a date picker for forms, a Twitter feed, and a photo gallery. Along the way you'll see how to test your designs on a variety of devices to make sure they're ready for prime time.
